

Our Mission

To provide comprehensive solutions that deliver operational excellence and to create a safe electrical environment.

Our Vision

To eliminate the complexity of electrical safety, providing efficient protection systems that offer total peace of mind without requiring expertise.

- Electrical Earthing
- Lightning Protection
- Electrical Enclosures
- Cable Management

OUR PRODUCTS

EARTH ENHANCING COMPOUNDS

Excel Earthing Compound reduces soil resistivity, retains moisture, and ensures long-lasting conductivity for stable grounding performance.

Excel Earthing Compound

Electrafill

Electrafill Plus

Conductive Concrete

SPECIALITIES OF OUR COPPER BONDED EARTH ELECTRODE

INTERNAL QUALITY TEST AS PER UL 467

COPPER BONDED RODS

99.95% Pure Copper Bonded to nickel-sealed steel core for superior strength and corrosion resistance.

EXTENDABLE COPPER BONDED

Extendable Copper Bonded Rods ensure stable grounding by reaching low-resistivity soil with easy deep installation.

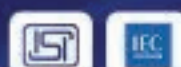

COPPER BONDED PLATES

Copper Bonded Plates offer durable, corrosion-resistant, and cost-effective grounding with 99.95% pure copper bonded to nickel-sealed steel.

VERTICAL AIR TERMINATION RODS / LIGHTNING ARRESTERS

Vertical Air Terminals protect structures from lightning using copper or stainless-steel rods with insulated bases for safe installation.

50 SQ.MM. FLEXIBLE INSULATED DOWN CONDUCTOR

50 Sq.mm Aluminum Conductors ensure safe lightning current flow with insulated options to prevent flashover and touch voltage.

EARTH PIT / INSPECTION CHAMBERS

Ready-made UV-resistant Earth Pit Chambers ensure safe, durable enclosure for earthing systems with easy maintenance access.

COPPER BONDED STRIP

Copper bonded strips offer a cost-effective earthing and lightning protection solution with 100/250 micron coating thickness.

EARTH BENCH/ TERMINAL STRIP

Stainless steel earth benches provide a common earthing point with bonding, testing, and insulated holder features for safety.

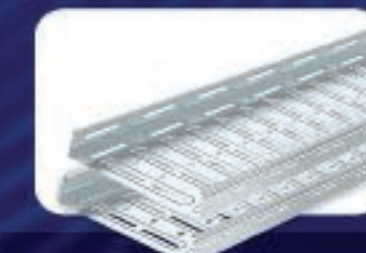

METER BOX

Our Meter Box is designed for safe, durable, and hassle-free electrical installations with spacious working access, dust protection, and rust-free construction. Built with advanced Triple Layer Protection technology featuring GP Sheet, Nano Coating, and UV-Protected Pure Polyester Powder Coating, it ensures superior corrosion resistance, weather durability, and long service life for residential, commercial, and industrial applications. Enhanced cable insulation protection ensures safe wiring management and improves electrical safety.

CABLE TRAY

Excel Cable Trays are designed for efficient cable management, enhanced ventilation, and long-lasting durability. Manufactured from high-quality 120 CSM Jindal Steel, they provide strong mechanical support while ensuring safety and easy installation in industrial, commercial, and infrastructure projects.

ACCESSORIES AS PER IEC 62305 SERIES

HOLDER FOR 8MM INSULATED ALUMINUM CONDUCTOR

NYLON HOLDER FOR 8MM BARE CONDUCTOR

ROOF BARE CONDUCTOR HOLDER

ROOF INSULATED CONDUCTOR HOLDER
